

January 16, 2021

As of yesterday's report, Greenwood County had 21 additional confirmed cases in the county for a total of 4,928 cases confirmed since 21 March. **(The cases the past five days are not accurate due to an internal system issue at DHEC. They will update the numbers as soon as they are able to correct the issue.)** *Remember this is only those which have been confirmed and is for those who were tested a minimum of two days ago. This means there are others who have been tested and are in quarantine awaiting results. Additionally, an individual can be asymptomatic, (contagious but shows no symptoms), and may choose not to be tested.*

The first 4,146 cases in Greenwood County were reported over 15 days ago, so there are 4,146 individuals who should have recovered from the virus. Additionally, Greenwood County has had **98** confirmed deaths due to the virus. **(SCDHEC reported one death of an elderly individual.)** This brings Greenwood County's remaining estimated total of active confirmed cases to 684. *DHEC does not track recovered individuals by county, so this number is an estimate based on the following: Most individuals recover from the virus within this time frame.*

From 31 December until 13 January (2 weeks), Greenwood has had 741 confirmed cases out of a population of 70,811. This equates to an incident rate of **1,046.4** per 100,000 individuals which is rated as **high** by SCDHEC. (Low = 50 or less; Medium = 51 - 200; High = 201 or more)

SCDHEC reported an additional 1,845 new confirmed cases in the state for a total of 341,597. Also, they reported 93 new confirmed deaths in the state for a total of 5,513. Please click this [link](#) to see the deaths by county. **(The cases the past four days are not accurate due to an internal system issue at DHEC. They will update the numbers as soon as they are able to correct the issue.)** For additional information on underlying conditions or other information in this section, please call DHEC at 1-855- 472- 3432. *SCDHEC has begun providing a number of probable cases and deaths. I will only be providing the confirmed numbers. Once a probable case or death is confirmed, they will add it to their confirmed total and I will report it.*

SCDHEC reported 9,548 of 11,307 inpatient beds are in use for an 84.4% usage rate statewide. Of the 9,548 beds in use, 2,424 are occupied by patients who either have tested positive or are under investigation for COVID-19. This is 25.4% of the beds in use.

As of 14 January, Greenwood County has 190 of 206 hospital beds in use which is 92.2% utilization rate. As of 14 January, Self Regional reported 78 COVID-19 patients with 15 in ICU. Of these, 13 patients are on ventilation.

SCDHEC has created a dashboard which tracks the COVID-19 cases in K-12 schools within SC. Please click this [link](#) to see the numbers of reported cases by school.

SCDHEC is finding an increased rate of individuals who do not have symptoms and don't know they are infectious as they have expanded testing. This increases the risk of spreading the virus. Over the past couple of weeks, Greenwood County has seen the number of cases of COVID-19 increase. It is important we slow the spread of the virus by **keeping 6 feet apart, washing our hands, avoiding large gatherings, remaining home when sick** and wearing face coverings when in public facilities which do not allow for social distancing.

To view additional state level data see [DHEC's COVID-19 webpage](#).

To view additional county level data see [DHEC's SC County-level data for COVID-19](#).

The following are the dates and locations for COVID-19 mobile test sites in Greenwood County.
